

AI and LLM pricing report for companies

Stand: 2026-08-19T09:07:12+02:00

Management summary with pricing coverage, quality status and provider orientation. Additional detail analyses, full data exports, API access and individual scenario reports can be requested from CheckCom.

Further information, detailed CSV/API exports and individual company reports can be requested from CheckCom.

Key figures

Price rows	1466
Models	677
Providers	27
Avg. quality score	27.4
Review required	1283
Supported additional prices	287

Interpretation

A higher quality score indicates stronger support from sources, primary-source evidence and plausibility checks. 'Review required' marks entries that should be checked carefully before procurement because of source, model alias, price component, region or route.

The values support procurement, IT, privacy and management decisions. Contract, privacy and legal requirements must be reviewed individually before procurement.

Provider overview

Provider	Price rows	Models	Avg. quality	Status
OpenAI	279	104	30.0	prüfen
Alibaba / Qwen	194	111	33.3	prüfen
